

# KC Online Bulk Extractor

## Document and Data Extraction for Rapid ECM System Migration

### AT A GLANCE

The KC Online Bulk Extractor and Bulk Loader modules are highly flexible out of the box applications, designed to enable organizations to quickly and easily extract and import Document and Index Data from other Enterprise Content Management (ECM) solutions, including IBM, SharePoint, OpenText and Hyland, KC Online Bulk Extractor provides a cost effective migration of documents and index records between ECM technologies and Bulk Loader enables the bulk load of documents and index records into KC Online.

### Rapid and Cost Effective Enterprise Content Management Migration

Knowledge Capture® Online (KC Online) Bulk Extractor is a software application designed to enable organisations to quickly and cost effectively extract objects/documents and meta (index) data from their incumbent Enterprise Content Management (ECM) system.

Utilising time proven ECM repository 'connectors', KC Online Bulk Extractor has out of the box connectivity to the industry leading ECM technologies including IBM, Microsoft, Oracle, EMC and Hyland, delivering for the first time, the ability to cost effectively achieve freedom from your incumbent ECM service provider.

Utilising a simple and intuitive Windows based graphical user interface, KC Online Bulk Extractor enables system administrators to perform either selective or bulk object/document extraction, in native format, to a designated File System along with all associated meta/index data.

Knowledge Capture Bulk Extractor delivers a broad range of 'out of the box' business benefits and capabilities including:

- Out of the box connectors to industry leading ECM repositories
- Priced per repository connection and not on migration volume
- Objects/Documents extracted in native format
- Object/Document meta (index) data extracted in CSV or XML format
- Object/Document and index data release to a designated file system
- Windows based Administrator application graphical user interface
- Full audit trail of all document extractions (successful and unsuccessful)
- Ability to perform selective or bulk object/document extraction
- Provided free of charge when utilising Knowledge Capture Online
- Optional – KC Online Bulk Loader application for ECM document loading enabling 'end to end' ECM system migration

### Our Pedigree

Integritie was founded in 2000, with customers in 35 countries. Integritie has developed industry leading image, social media, email capture automation and data extraction solutions and also provides a comprehensive content management and cloud service.

### Our Pricing Models

KC Online Bulk Extractor is sold as a licensed software application and priced on a per ECM repository connector basis.

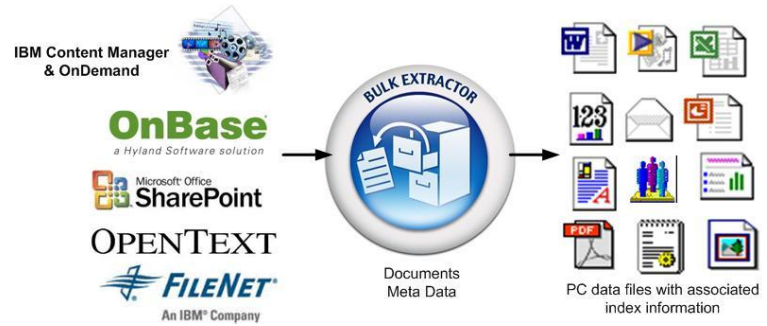

For customers joining KC Online in the Cloud (for hosted document management), KC Online Bulk Extractor is provided free of charge.

## ECM System 'Connectors'

In order to achieve a rapid and cost effective ECM system extraction, KC Bulk Extractor includes a range of 'out of the box' ECM connectors. Some of the connectors provided with KC Online Bulk Extractor include:

- IBM Content Manager (all versions)
- IBM Content Manager OnDemand (all versions)
- IBM FileNet Image Services and P8
- Microsoft SharePoint 2010+
- Hyland OnBase (all versions)
- ECM Documentum
- OpenText LiveLink

For customers with 'in house' or historic legacy ECM technologies, KC Online Bulk Extractor can cost effectively be adapted to enable rapid and compliant document and meta/index data extraction. Technical services to achieve this are provided on a time and materials basis.

## Operating System Agnostic

KC Online Bulk Extractor can extract documents and meta/index data from a vast range of server hardware and operating systems by harnessing ECM manufacturer Application Programming Interfaces (API's), including IBM iSeries (AS/400), IBM pSeries (AIX), IBM zSeries (z/OS), Linux, Unix and all versions of MS Windows.

## Bulk or Selective Document Extraction

KC Online Bulk Extractor can quickly and easily be configured to achieve a short-term compliance or business driven need for a tactical/selective object/document extraction or alternatively a high volume, bulk, document extraction for a mass ECM system extraction and migration, by utilising a simple and intuitive GUI based administration application.

## Native Object Extraction with Associated Indexing/Meta Data

To ensure a simple and seamless transition between ECM vendor solutions KC Online Bulk Extractor delivers all extracted objects/documents in their original native format. Alongside each extracted object/document, KC Online Bulk Extractor also provides a CSV or XML copy of the associated index/meta data enabling a true 'like for like' ECM system extraction and migration.

## From Bulk Extraction to Bulk Loading

Having successfully extracted your ECM system objects/documents and index data, KC Online Bulk Loader can assist to achieve your end to end ECM system migration needs. Boasting a broad range of ECM connectors, KC Online Bulk Loader is designed to quickly and cost effectively 'bulk' load your exported ECM system objects into your new ECM system of choice, achieving a true 'end to end' ECM system migration capability.

## One Simple Price

Unlike many expensive data migration services, KC Online Bulk Extractor is licensed on a simple and cost effective, per Bulk Extractor instance regardless of document volumes. Rather than having to 'guesstimate' ECM document volumes, KC Online Bulk Extractor enables migrations to take place cost effectively over a longer period of time, using just one application instance, or in the case of time critical extractions, utilising multiple Bulk Extractor instances.

To discover how Knowledge Capture Bulk Extractor can cost effectively help your organisation cut free from the 'handcuffs' of your ECM technology provider contact Integritie today for a free demonstration and no-commitment quotation.
