

Accounts Payable in the Cloud

Invoice Information Extraction, Archival and Payment Approval

AT A GLANCE

The KC Online Accounts Payable application, provided OnPremise or in the Cloud, enables organizations to bring control, efficiency and cost savings to the handling and processing of invoices, purchase orders and credit notes. Combining invoice scanning with fully automated invoice data extraction and an out of the box invoice approval workflow, KC Online Accounts Payable Cloud ensures that financial documents are processed cost effectively, on time, every time.

Save on Accounts Payable Administration Costs and Increase Productivity

The Knowledge Capture® Online (KC Online) Accounts Payable application incorporates the very latest image capture, Optical Character Recognition and content management technology. By utilising our Accounts Payable application you can seamlessly manage your whole accounts payable function, from initial processing through to approvals and archiving, while gaining results in increased productivity and impressive cost savings.

Less Intervention, More Control

Over 70% of all invoice processing costs are swallowed up by document handling and manual data entry, so it's no surprise that improving back office efficiency results in significant cost savings.

Realise the Benefits of KC Online Accounts Payable:

- Invoice document scanning (from your location)
- Automatic invoice data extraction and validation whether it's on paper, email or fax
- Electronic invoice distribution (workflow) with email notification for rapid online invoice approvals
- Identification and management of invalid invoices (such as missing PO numbers, incorrect calculations and duplicated payments)
- Automatic invoice archival, retention and disposition (destruction)
- Audit trail of all invoice interactions
- Improved vendor management
- Improved visibility into AP liabilities
- Improved process analysis and information control
- Improved real-time reporting capabilities

Invoice Capture, Data Extraction and Validation

KC Online Accounts Payable begins with its ability to quickly and easily digitise physical and email invoices directly from your site, using industry leading imaging and image enhancement technology.

Capturing and Managing Documents From:

- Physical documents (invoices, PO's etc)
- Social media
- SMS texts
- Emails
- PC files
- Telephone voice conversations
- Other digital feeds

Provided OnPremise or in the Cloud Our Pricing Models

KC Online Accounts Payable is available as a Cloud or OnPremise solution

As a fully hosted Cloud or OnPremise Service, the KC Online Accounts Payable application can be priced on a per-user, per-month usage model, delivering enterprise level technology with no upfront capital costs, or purchased as a perpetual software application as part of a OnPremise installation

KC Online Accounts Payable

Once imaged, invoices can either be manually or automatically processed for data entry.

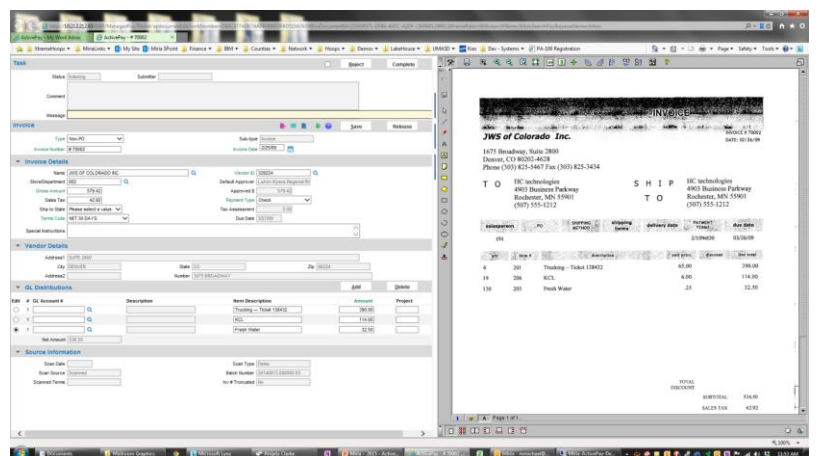

The KC Online Accounts Payable application delivers automated invoice header, line and footer information extraction, verified and validation eliminating the need for manual data entry and invalid invoice payments.

Achieving circa 70% out of the box data extraction accuracy, our Accounts Payable application self learns in order to automate processes, enabling efficiency with high volume extraction but low manual intervention.

Save Processing Time. Ensure Accountability.

By automating the collection, processing, and tracking of accounts payable, travel and expense, GL coding, and utility cost documentation, KC Online Accounts Payable standardizes disparate financial business content so that it may be analyzed and acted on quickly, bringing you unmatched time savings, error reductions, and the benefits of assured accountability.

Centralize collaboration. Streamline workflows.

Powered by the KC Online Cloud platform, access to Accounts Payable is consolidated within a central web portal, enabling streamlined collaboration between locations around business-critical AP and financial workflows.

Our user-friendly applications transform unstructured financial content from a costly struggle to a valuable advantage. From reducing complexity and process cycle times to minimizing data entry errors and exceptions, KC Online Accounts Payable will drive immediate productivity benefits and quantifiable ROI.

ERP/Finance Application Integration

KC Online Accounts Payable is designed with integration in mind. Whether it is invoice information lookups you are requiring or the final release of invoice information to your ERP/Finance system, KC Online Accounts Payable delivers this through its rich API and Web Services integration layer. Utilising minimal IT involvement, Integritie provide full application configuration and system integration assistance based on your unique application needs.

To discover how KC Online Accounts Payable can help your organisation cost effectively bring control and efficiency to the handling of invoices, contact us today for a free demonstration.
